

Tecron Sales Guide ARBOFLEX® PU

PRODUCT OVERVIEW

ARBOFLEX® PU

ARBOFLEX® PU is a pure polyurethane single component liquid, which once cured forms a seamless elastic membrane. The material properties of ARBOFLEX PU enable it to be airtight and waterproof on a range of substrates.

ARBOFLEX® ADVANTAGE

- Fast and Easy Installation
- Ready to use straight out of the tin – single component PU
- Weather-resistant: can be used all year round
- Seamless finish
- Green roof compatible
- BBA Certified
- Instantly water-resistant
- Adapts to any surface such as uneven, curved or irregular surfaces

	ARBOFLEX PU	GRP
Installation	Moisture curing, allowing more time to install	Requires a catalyst to cure, can have issues with humidity
Flexibility	Remains permanently flexible when cured	Little or no movement
Surface	Installed on most substrates without need for priming. (For Concrete, EPDM & TPO substrates consult our technical team)	Designed for new decks
Curing Time	Instantly waterproof once matting is encapsulated	Damaged if it rains during installation
