

1. Product Identification:

EPDM elastomer tape for damp proof insulation of wall and façade connections for buildings AlphaFacade OUT

2. Intended application:

Intended use and scope of application: Damp proof course for facade joints of the buildings are used to prevent penetration of moisture from outside to the facade structures. **AlphaFacade OUT** can also be used as a moisture barrier between the window joinery, door frame, balcony frame, all kinds of sill and the wall (wall, façade).

Damp proof insulation is used to prevent the capillary action of water from the substrate through the wall, the migration of water from one part of the building construction to the other and to prevent internal parts of the building construction from penetrating and directing it outside the building.
