

## PLX Touch Up Paints

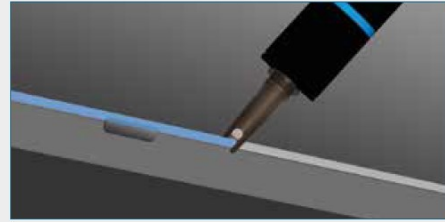

Sunchem touch-up paint is a special paint for touching up mechanical damage to factory-painted SSAB GreenCoat. Available in a range of colours and 12ml pencils or 250ml cans this is an ideal solution for dressing any surface scratches

- Good adhesion
- Water based
- Fast drying

## Lap Sealing Oil

Abratex lap sealing oil is made from non-drying oils and is used as a seam sealant for all types of metal roofs. The lap sealing oil swells on contact with water which happens in the joint. The product must therefore not be diluted. Lap sealing oil is excellent for sheet metal seams or cross-welts. Lap Sealing oil is applied with a twist on brush head.

## Seam applicator M300

It allows the sealant to be applied directly to the lower seam. Eliminating the need to turn the sheet over prior to sealing. Thus reducing the risk of mounting induced scratches. In addition, the applicator makes it easy to control the sealant.

Fits caulking gun green "Non-drip" (400703)

400710

Seam applicator M300 for cartridge

Sold individually

Applicator that guides the Seam Sealant tubes during application to the seam. Reduces the risk of scratches and damage during installation as there is no need to turn the sheet. Easy to control the width of the joint.
